DETAILED ACTION

Allowable Subject Matter

1. Claims 1-25 are allowed.
2. The following is an examiner's statement of reasons for allowance: many references in the art disclose a monitoring antenna system including at least two antenna loops disposed in each of first and second intersecting planes intersecting at an angle α to define a detection region there-between in which each of said two antenna loops transmit and/or receive electromagnetic signals with a component of an associated electromagnetic field in each three mutually orthogonal directions and through which an object may pass, a processor for processing at least received signals; and means for coupling at least two antenna loops and the processor for coupling at least the received signals there-between, such as found in Rodgers et al. (US 6,351,215). The prior art of record does not teach or suggest, in the claimed combination, an antenna arrangement for detecting a wireless article comprising a first antenna loop disposed in a first plane for transmitting and/or receiving electromagnetic signals; a first tunable circuit connected to said first antenna loop for coupling at least received signals therefrom; a second antenna loop disposed at least in part in the first plane and overlapping at least in part said first antenna loop therein, wherein said first and second antenna loops overlap at in part in the first plane and define a detection region adjacent thereto in which the first and second antenna loops transmit and/or receive electromagnetic signals which a wireless article may be; a second tunable

circuit connected to the second antenna loop for coupling at least received signals therefrom; and a processor coupled to the first and second tunable circuits for processing at least received signals from the first and second antenna loops for detecting a wireless article in the detection region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
